**Cost-effective and reliable Digital Signage communication platform**

Shuttle's DS61 is a slim, but powerful x86-based Digital Signage Platform offering the best quality, performance and connectivity to meet the requirements of processing high quality digital media. DS61 helps you build an affordable media player to spice up your marketing and merchandising effectiveness at exhibitions, hotels, office lobbies, customer waiting areas, shopping malls and retail outlets - the possibilities are highly versatile. With its robust metal chassis and outstanding temperature range the DS61 is an industrial-grade signage platform designed for long-term, smooth and reliable operation.

Shuttle Slim-PC Barebone DS61 – Product Features

Robust, stylish and particularly small
You should have held it in your own hands to see how small it actually is. Barely measuring a volume of 1.35 litre, its steel chassis gives it the appropriate stability required for professional applications in digital signage. Despite its dimensions of 19 x 16.5 x 4.3 cm (LWH), the overall system performance is very high thanks to support of Intel Core desktop processors. The interior of the DS61 is very tidy too so that it won’t take long to set it up. Its sleek and stylish looks lets it easily find a place in both home and office environments.

What does Barebone mean?
The Shuttle Slim-PC Barebone DS61 consists of a stylish metal case with pre-installed mainboard, cooling system and external power adapter. Despite its small form factor it offers outstanding connectivity, functionality and performance. For a complete Mini-PC system, a few components still need to be added. The Mini-PC is customisable and takes socket 1155 processors (max. 65W TDP), DDR3 SO-DIMM memories and a 2.5” storage drive (hard disk or SSD). Once the desired operation system is installed, the DS61 is ready to use. Moreover, the system features pre-routed cables that are tied down from factory to reduce clutter, increase airflow and ease component installation.

Supports LGA1155 processors and up to 16 GB DDR3
A wide range of socket 1155 Intel processors is available starting from Celeron up to Core processors with a maximum TDP of 65W. Plus, the system memory can be installed according to individual needs up to a maximum capacity of 16 GB DDR3 memory.

Low noise thanks to heat-pipe cooling system
An active dual-fan heatpipe cooling system ensures whisper-quiet operation and system stability. The following results have been measured in combination with an Intel Core i5-3450S processor:
1) Idle mode: 24.5 dBA, fan: 1912 RPM
2) 3DMark06: 27.1 dBA, fan: 2250 RPM
(front side sound pressure in 0.5 meter distance at 25°C ambient temperature)

Extended temperature range and reliability
The DS61 is outstandingly robust thanks to its tough chassis, and with an operating temperature range of 0-50 °C it is suitable for use in the most demanding environments. Designed entirely using all solid capacitors, DS61 is guaranteed to deliver maximum stability, reliability and longer system lifetime for long-term applications like digital signage.
Caution: for high ambient temperature over 40°C we strongly recommend to use SSDs (supporting at least 70°C) and rugged SODIMM memory with wide temperature range (up to 95°C).
Energy-saving
The power consumption mainly depends on the processor in use and its load. Using an Intel Pentium G860 processor, the system consumes about 23W in idle mode (27W with Intel Core i7-2600S). Under full load, the power consumption is 52W (94W respectively). Note: the maximum output wattage of the power adapter is specified with 90W. Assuming, the adapter's efficiency is 90%, the input wattage can be up to 100W.

Great Connectivity
Despite its small size, DS61 sports a wide range of I/O connectors. Beside the SD card reader, it features each a couple of USB 3.0, USB 2.0, Gigabit LAN, digital video, audio and serial ports.

Dual Gigabit LAN Network
Today's media-rich communications across the internet and within enterprises create new demands for clients in Local Area Networks. For that reason, Shuttle applies Gigabit LAN performance to their Mini-PCs and DS61 even supports two of them. Dual networking allows the computer to connect to a single network using two cables at once with an appropriate switch (teaming mode with load balancing or failover function) or to two different networks depending on the needs of the user.

Dual View Technology with HDMI and DVI
DS61 features two digital video outputs: HDMI and DVI-I. Dual View technology offers multiple display support on up to two separate monitors. This helps to improve on productivity by allowing for spreading multiple windows across two monitors while working with them simultaneously.

Video outputs
With optional adapters DVI-D devices can be connected to the HDMI port or VGA devices to the DVI-I port, respectively.

DVI-D means the connector only outputs digital video signals.
DVI-I means digital and analog video signals are put out.
HDMI supports digital video plus multi-channel digital audio output.
D-Sub / VGA means analog video signals are put out.

Two serial ports
Many PCs do not have these legacy ports any longer, since they have been superseded and replaced by USB for most consumer applications, but they are still commonly used for applications such as industrial automation systems, scientific analysis, POS systems and other industrial applications. DS61 features two serial RS-232 ports which also support both 5 or 12V auxiliary voltage. The left COM port also supports the RS422 and RS485 standard.
Expansion slot for Mini-PCI-Express cards
The Mini-PCIe expansion slot can be used either for a half size or a full size card. It provides not only PCIe and USB 2.0 but also supports mSATA (Mini Serial ATA), which is the new generation of Solid State Drives (SSD) in a compact Mini PCIe card form factor.

Photos: half size Mini-PCIe WLAN card (left) and mSATA SSD card (right).

VESAmount
The supplied 75/100mm VESA mount allows it to install DS61 on to walls or just affixed on the rear side of a monitor which is particularly interesting for the industry segment, company buildings and public institutions. Beside this, the chassis of DS61 provides numerous threaded holes (M3) enabling it to be fitted almost anywhere.

Kensington Lock
This is a small, metal-reinforced hole as part of an anti-theft system. DS61 provides an appropriate hole on both side of its chassis. The lock-and-cable are not included.

External power button by separate remote line
If because of space constraints (e.g. in the case of fixed installation) the machine cannot be switched on by pressing the front power button, it can be powered on by a separate remote line. You will find an appropriate two-pin-connector at the back panel of DS61 (pitch 2.54 mm).
Connectivity / Applications

The DS61’s great connectivity makes it well-suited for a wide field of applications and external devices.

- Point-of-Sales (POS)
- Office Display
- Dual-Network
- PC Speakers
- Automation
- Home Cinema & Digital Signage
- Peripherals
- USB hard disk
- RS232
- RS422/485
- DVI-I
- 2x RJ45
- Audio
- USB 2.0
- USB 3.0
- HDMI
- USB hard disk

The DS61 is your powerful 1.3-litre Slim-PC solution for high performance driven applications, e.g.:

- Digital Signage
- In-store Audio/Video entertainment
- Gambling
- Home-Media
- Office
- Call Center
- Education
- Kiosk
- Point of Sales (POS)
- Medical
- Automation
- Small server
Shuttle DS61 – Front and Back Panel

Front view

1 SD Card Reader
2 Power LED
3 Hard disk LED
4 Power Button
5 2x USB 2.0
6 Microphone input
7 Headphone output

Rear view

A 2x WLAN perforation
B RS232/RS422/RS485
C RS232
D Ventilation grille
E DC power input
F 2x RJ45 Gigabit LAN
G 2x USB 3.0
H HDMI video port
I DVI-I video port
J Connector for external power button (two pins, 2.54 mm pitch)
K 2x holes for Kensington Lock
L VESA mount (two parts)

Right side

Left side

COM port Pin 9 Configuration
Pin 9 is a multi-functional signal. Based on Jumper JP2 configuration on the mainboard, it can be configured as Ring Indicator (RI) or external power supply with either 5V or 12V voltage level (each COM port separately).
Shuttle DS61 – Mainboard

Shuttle DS61 – Required Components

The following components need to be added to make it a fully-configured Mini-PC:

- LGA1155 processor
  - TDP max. 65W (22 or 32nm)
  - Core i7 / i5 / i3, Pentium or Celeron
- 2.5” SATA hard disk or Solid State Disk (SSD) (max. 12.7 mm height)
- Up to two DDR3-1333/1600 SO-DIMM memory modules max. 8GB each
- Windows / Linux Operating System
# Shuttle DS61 Specifications

| **Chassis** | Nettop PC with black chassis made of metal  
Dimensions: 190 x 165 x 43 mm (LWH) = 1.35 litres  
Storage bays  
Weight: 1.3 kg net and 2.1 kg gross  
Two holes for Kensington Locks and numerous threaded holes (M3) at both sides of the chassis |
| **Storage Bay** | 1x 6.35cm / 2.5" storage bay supports one hard disk or SSD drive  
Device height: 9.5 or 12.7mm (max.) |
| **Operation System** | This system comes without operating system.  
It is compatible with Windows 8, Windows 7, Windows Vista, Windows XP and Linux (tested with OpenSUSE 12.2, Ubuntu 12.10 and Fedora 17) |
| **Mainboard Chipset BIOS** | Chipset: Intel® H61 Express Chipset  
AMI BIOS in 8Mbit EEPROM with SPI interface  
All capacitors are high quality solid capacitors  
Supports hardware monitoring and watch dog functionality  
Supports Unified Extensible Firmware Interface (UEFI) [2]  
Supports resume after power failure |
| **Power Adapter** | External 90W power adapter (fanless)  
Input: 100–240V AC, 50/60 Hz  
Output: 19V DC, 4.74A, max. 90W  
DC Connector: 5.5/2.5mm (outer/inner diameter) |
| **Processor Support** | Socket 1155 (LGA 1155) supports the second and third generation of Intel Core i3 / i5 / i7 / Pentium / Celeron processors  
with a power consumption of up to 65W TDP  
- Codename “Sandy Bridge”, 32nm process technology and  
- Codename “Ivy Bridge”, 22nm process technology  
Not compatible with older Socket-1156 processors.  
The Processor integrates PCI-Express, memory controller and the graphics engine on the same die (depends on processor type)  
Please refer to the support list for detailed processor support information. |
| **Processor Cooling** | Processor cooling with two 60mm fans on the upper side of the chassis |
| **Memory Support** | 2x SO-DIMM slots with 204 pins  
Supports DDR3-1066/1333/1600 SDRAM memory (PC3-8500/10600/12800)  
The maximum memory clock rate depends on the processor type.  
Supports Dual Channel mode  
Supports max. 8 GB per DIMM, maximum total size of 16 GB  
Supports two unbuffered DIMM modules of 1.5V |
### Integrated Graphics

- The features of the integrated graphics function depend on the used processor type.
- "Sandy Bridge" processor: Intel® HD Graphics 2000/3000, DirectX 10.1
- "Ivy Bridge" processor: Intel® HD Graphics 2500/4000, DirectX 11
- Maximum shared memory size: 1.692MB
- Supports HDMI, max. resolution up to 1920x1200 @ 60Hz
- Supports DVI, max. resolution up to 1920x1200 @ 60Hz
- Supports D-Sub, max. resolution up to 2048x1536 @ 75Hz (optional VGA-to-DVI-adapter required)
- Supports Blu-ray Stereoscopic 3D with HDMI 1.4a [1]
- Supports HDCP function with DVI and HDMI ports
- Supports Full HD 1080p Blu-ray (BD) / HD-DVD playback with DVI and HDMI ports
- Supports Dual-Independent-Display via HDMI and DVI-I port
- HDMI supports HD video plus multi-channel digital audio via a single cable

### Mini-PCIe slots

- 1x Mini PCI Express expansion slot, full size
- supports PCIe 2.0, SATA 3G and USB 2.0
- e.g. for Mini SATA (mSATA) flash memory cards [6]

### Audio

- Realtek® ALC 662 High-Definition Audio (5.1 channel)
- Two analog audio connectors (3.5mm) at the front panel:
  1) 2 channel line out (head phone)
  2) microphone input
- Digital multi-channel audio output: via HDMI

### Dual Gigabit LAN Controller

- Dual Realtek 8111E Ethernet network controller (Gigabit)
- Supports 10 / 100 / 1.000 MBit/s operation
- With two RJ45 ports (dual network) supports Teaming [4]
- Supports WAKE ON LAN (WOL)
- Supports network boot by Preboot eXecution Environment (PXE)

### Drive Connectors

- 2x Serial-ATA II, 3 Gb/s (300 MB/s) bandwidth
- Supports Unified Extensible Firmware Interface (UEFI) [2]
- Note: This barebone system comes with one pre-installed SATA cable

### Card reader

- Integrated card reader supports SD, SDHC and SDXC memory flash cards
- Supports boot up from SD card.

### Front Panel Connectors

- Microphone input
- Audio Line-out (headphone)
- 2x USB 2.0
- SD card reader
- Power button
- Power LED (blue)
- HDD LED (yellow)
## Back Panel Connectors

## Scope of delivery

- Multi-language user guide
- VESA mount for 75/100mm standard (two metal brackets)
- Four thumbscrews M3 x 5 mm (screws together VESA mount and PC)
- Four screws M4 x 10 mm (to fix the VESA mount to the external device)
- Four screws M3 x 4 mm (to mount a 2.5" storage into the bay)
- Driver DVD (Windows 7 32/64 bit, Windows Vista 32/64 bit, Windows XP 32 bit)
- 1x SATA cable (preinstalled for 2.5 HDD/SSD drive)
- 1x 4 pin to SATA power cable
- External power adapter with power cord
- Screws and heatsink compound

## Environmental Specifications

- Operating temperature range: 0—50°C [7]
- Relative humidity, non-condensing: 10—90%

## Conformity Certifications

- EMI: FCC, CE, BSMI, C-Tick
- Safety: CB, BSMI, ETL
- This device is classed as a technical information equipment (ITE) in class B and is intended for use in living room and office. The CE-mark approves the conformity by the EU-guidelines:
  - EMV-guideline 89/336/EWG electromagnetic tolerance
  - LVD-guideline 73/23/EWG use of electric devices within certain voltage-limits

---

**[1]** HDMI version supported
HDMI 1.4 is not supported by all LGA1155 processors. Some models support HDMI 1.3 only.

**[2]** Unified Extensible Firmware Interface (UEFI)
required when booting from hard disks larger than 2.2 TB under Windows 64 bit operating systems such as Windows 7, Windows Vista SP1 and Windows Server 2008/2003 SP1.

**[3]** Integrated video outputs (HDMI and DVI-I)
Not all LGA1155 Intel processors support integrated graphics. Please check the specification of the used processor. If you want to use the video outputs, then please make sure, that the used processor provides integrated graphics.

**[4]** Teaming Mode
The teaming function allows you to group both available network adapters together to function as a single adapter - a method of creating a virtual LAN. The benefit of this approach is that it enables load balancing and failover.

[5] **Optional Wireless LAN module:**
this Slim PC supports an optional WLAN module, which consists of a half-size Mini-PCle card with IEEE 802.11n functionality and an external antenna with appropriate antenna cable.

[6] **mini-SATA (mSATA)**
not to be confused with the "micro SATA" connector, is a newer industry standard which converts the electrical SATA interface (1.5 or 3.0 Gbit/s) to the physical "Mini PCI Express" mini card form factor.

[7] **Caution:** for high ambient temperature over 40°C we strongly recommend to use SSDs (supporting at least 70°C) and rugged SODIMM memory with wide temperature range (up to 95°C).
